#### **BUSINESS**

Paper 3 Case Study MARK SCHEME Maximum Mark: 100 9609/31 May/June 2022

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2022 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

### Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
  is given for valid answers which go beyond the scope of the syllabus and mark scheme,
  referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

# Social Science-Specific Marking Principles (for point-based marking)

1	<ul> <li>Components using point-based marking:</li> <li>Point marking is often used to reward knowledge, understanding and application of sk We give credit where the candidate's answer shows relevant knowledge, understandir and application of skills in answering the question. We do not give credit where the an shows confusion.</li> </ul>									
	Fro	From this it follows that we:								
	a b	DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term) DO credit alternative answers/examples which are not written in the mark scheme if they								
	C	are correct DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type								
	d e	answers. For example, questions that require <i>n</i> reasons (e.g. State two reasons). DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.) DO NOT credit answers which are obviously self-contradicting or trying to cover all								
	f	possibilities DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).								
	g	DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)								
2	Pre	esentation of mark scheme:								
2	•	Slashes (/) or the word 'or' separate alternative ways of making the same point. Semi colons (;) bullet points (•) or figures in brackets (1) separate different points. Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).								
3	Са	culation questions:								
U	<ul> <li>Calculation questions:</li> <li>The mark scheme will show the steps in the most likely correct method(s), the mark feach step, the correct answer(s) and the mark for each answer</li> <li>If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to calculation should be given full credit, even if no supporting working is shown.</li> </ul>									
	<ul> <li>calculation should be given full credit, even if no supporting working is shown.</li> <li>Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.</li> <li>Where an answer makes use of a candidate's own incorrect figure from previous wor the 'own figure rule' applies: full marks will be given if a correct and complete method used. Further guidance will be included in the mark scheme where necessary and an exceptions to this general principle will be noted.</li> </ul>									

### 4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

#### PREPARATION FOR MARKING

- 1 Make sure that you have completed the relevant training and have access to the *RM Assessor Guide*.
- 2 Make sure that you have read and understand the question paper, which you can download from <u>https://support.rm.com/ca</u>
- 3 Log in to RM Assessor then mark and submit the required number of practice and standardisation scripts. You will need to mark the standardisation scripts to the required accuracy in order to be approved for marking live scripts. You may be asked to re-mark them, or to mark a second sample, if you do not meet the required accuracy on your first attempt.

#### MARKING PROCESS

- 1 Mark strictly to the FINAL mark scheme, applying the criteria consistently and the general marking principles outlined on the previous page.
- 2 If you are in doubt about applying the mark scheme, consult your Team Leader.
- 3 Mark at a steady rate through the marking period. Do not rush, and do not leave too much until the end. If you anticipate a problem in meeting the deadline, contact your Team Leader immediately and the Examiners' Helpdesk.
- 4 Examiners will prepare a brief report on the performance of candidates to send to their Team Leader via email by the end of the marking period. The Examiner should note strengths seen in answers and common errors or weaknesses. Constructive comments on the question paper, mark scheme or procedures are also appreciated.

#### MARKING SPECIFICS

#### Crossed out work

- 1 <u>All</u> of a candidate's answers, *crossed out* or not, *optional* or not, <u>must</u> be marked.
- 2 The only response not to be marked is one that has been crossed out and <u>replaced</u> by another response for that <u>exact same</u> question.
- 3 Consequently, if a candidate has crossed out their response to an <u>optional</u> question and gone on to answer a <u>different</u> optional question then <u>both</u> attempts must be marked. The higher mark will be awarded by the system according to the rubric.

#### 0 (zero) marks or NR (no response)

- 1 Award **NR** if there is <u>nothing</u> at all written in answer to that question (often the case for optional questions).
- 2 Award **NR** if there is a <u>comment which is not an attempt</u> at the question (e.g. 'can't do it' or 'don't know' etc.)
- 3 Award **NR** if there is a <u>symbol</u> which is <u>not an attempt</u> at the question, such as a dash or question mark.
- 4 Award **0** (zero) if there is any <u>attempt at the question which does not score marks</u>. This includes copying the question onto an Answer Booklet.

#### Annotation

- 1 Every <u>question</u> must have <u>at least one</u> annotation e.g. <NAQ> if it is an NR and <X> or <seen> if 0 marks are awarded.
- 2 Every <u>page</u> of a script must have <u>at least one</u> annotation e.g. <BP> for a blank page.

# Paper 3 Specific Marking Guidance

- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Handwriting and use of English language are not to be assessed.
- A response consisting of a list should be assessed. It is unlikely that such a response will score highly in the levels in each Assessment Objective.
- If a response does not fit in the space provided it should be assessed as if it did whether it is shorted, or longer and a continuation sheet is used.
- The main RM Assessor annotations to be used are K (Knowledge), APP (Application), AN (Analysis), EVAL (Evaluation).
- For each of these four annotations, the number of marks awarded must match the number of times that annotation is on the response.
- Only award EVAL if the candidate has also demonstrated APP.
- Application marks are not awarded for repeating material from the case study. Application is achieved by answering in the context of the case or by using the information in the case to help answer the question.
- In Section B, candidates answer either **Question 6** or **Question 7**. The Section B question that the candidate does not answer must be entered as 'no response'.

This mark scheme includes a summary of appropriate content for answering each question. It should be emphasised, however, that this material is for illustrative purposes and is not intended to provide a definitive guide to acceptable answers. It is quite possible that among the scripts there will be some candidate answers that are not covered directly by the content of this mark scheme. In such cases, professional judgement should be exercised in assessing the merits of the answer and the senior examiners should be consulted if further guidance is required.

Application marks are not awarded for repeating material from the case study. Application is by answering in the context of the case or by using the information in the case to help answer the question.

Question	n Answer					
1	-	e <u>two</u> benefits to HD sibility (CSR).	of increasing its focus	s on corporate social	10

Question	Answer			
1	<ul> <li>Application: Making use of the business context:</li> <li>HD designs, manufactures and supplies circuit boards, not easily recycled</li> <li>Metals used are difficult to recycle – CSR could include designing circuit boards that can be more easily recyclable</li> <li>Supplying to certain customers e.g. social media, police, security forces, governments may have particular CSR implications.</li> <li>Some manufacturers make payments not shown in accounts – unethical.</li> <li>High labour turnover in Design Division – CSR could reduce this.</li> <li>Increasing levels of competition – CSR as a differentiator or USP for HD</li> <li>Two pressure groups and government have requested a social audit – could this cost be avoided with focus on CSR?</li> <li>Analysis:</li> <li>Building of chains of arguments linked to Knowledge and Application points raised above, drawing out an implication or consequence for HD.</li> <li>Increased monitoring and implementation of CSR could result in increased sales to e.g. universities, some governments</li> <li>Some activities of HD may appear to be problematic regarding CSR, a positive social audit will lead to transparency and improved public image.</li> <li>With increasing competition HD will benefit from further developing competitive advantage. A greater focus on CSR could provide a USP and enable HD to increase sales or increase price as demand may become more price inelastic.</li> <li>Legal, financial and environmental legislation is more likely to be complied with so less risk and possibility of fines.</li> <li>Increased focus on CSR may make HD a more attractive organisation to work for leading to easier recruitment and better labour retention which will reduce costs.</li> </ul>			

Question	Answer	Marks
2(a)(i)	Refer to Table 1 and lines 45–48. Calculate the:	3
	(i) difference in labour turnover between the Design Division and the Manufacturing Division for January to May 2022	
	Labour turnover is number of employees leaving employment <i>I</i> Number employed in a time period $\times$ 100 (1 mark if no rewardable calculation)	
	Design: 5 / 18 × 100 = 27.78(%) (1)	
	Manufacturing: 1 / 22 × 100 = 4.55 (%) (1)	
	Difference = 27.78 – 4.55 = 23.23(%) or 23.2(%) (3)	
	Likely variations 28 – 5 = 23 27.8 – 4.6 = 23.2	
	3 marks for 23 to 23.45	
	Other answer $5 - 1 = 4 (1)$	
	OFR	
2(a)(ii)	(ii) capacity utilisation in May 2022.	2
	Capacity utilisation = current output level / maximum output level × 100 (1 mark if no rewardable calculation)	
	1.05 / 1 × 100 (1)	
	= 105% or 105 (2) NOT 105 m or \$105 m (max 1 mark for relevant working)	

Question			Answe	r		Marks
2(b)	Recomm	may refer to your answer to (2a) and other information. Immend how HD could solve the problem of operating over mum capacity. Justify your recommendation.

	-	use of the busine ctional organisat	ess context: ion of HD – Desig	n, Manufacture,	Marketing,	

Question	Answer	Marks
Question	<ul> <li>Structure successful</li> <li>Matrix structure of Design Division <ul> <li>Design engineers work in teams for life of each project linked to drawing range of relevant skills together.</li> <li>Teams choose own leader – delegation increasing motivation</li> <li>Teams choose own customer liaison – link to meeting customer needs</li> </ul> </li> <li>HD has excellent reputation for supplying quality boards</li> <li>HD is a successful company – grown over 20 years.</li> </ul> Structure not successful <ul> <li>Project completion dates are delayed</li> <li>Absenteeism and labour turnover in Design Division is increasing and higher than in manufacturing which uses hierarchical structure</li> <li>Comments from design engineer <ul> <li>Two managers to report – causes confusion</li> <li>Constantly changing teams – creates uncertainty</li> </ul> </li> <li>Monitoring of progress on contracted work appears non-existent.</li> </ul> Other factors in success not related to structure <ul> <li>Self-directed graduate engineers and directors</li> <li>Flexibility of working from home – link to motivation</li> </ul> Analysis: <ul> <li>Design work lends itself to independent self-motivated people.</li> <li>HD has decentralised decision making in Design Division which assists skilled employees to think creatively.</li> <li>No hierarchy in Design Division so how are decisions made? This may be a reason for late completion of projects.</li> <li>Over capacity indicates lack of planning due to lack of strategic focus</li> <li>Informal structure with low control, high delegation and trust resulting in motivation and better quality design of circuit boards</li> <li>Structure contributes to lowering of morale and consequent problems of increased labour turnover which increases costs</li> <li>Labour turnover is lower in the manufacturing division – could be because of increased sense of purpose due to hierarchical structure and closer supervision</li> </ul>	Marks
	<ul> <li>and closer supervision</li> <li>Evaluation:</li> <li>Only award EVAL if the candidate has also demonstrated APP.</li> <li>Successful matrix structure depends on individuals.</li> <li>Matrix structure well suited to design tasks and business objectives</li> <li>Company obviously successful after 20 years with current structure</li> <li>No evidence of conflicts between employees, managers and workers</li> <li>Problems such as differing Divisional rates of labour turnover indicate that the structure needs to be changed or modified in the direction of more control, formality, and centralisation – e.g. team leaders.</li> </ul>	

Question	Answer	Marks
4(a)(i)	Refer to Tables 2 and 3. Calculate HD's: (i) return on capital employed (ROCE)	4
	ROCE = operating profit / capital employed × 100 <b>OR</b> Capital employed = equity + non-current liabilities + reserves <b>OR</b> non-current assets + current assets – current liabilities (1 if no rewardable calculation)	
	Capital employed = 4 + 10 + 10 = 24 (2)	
	ROCE = 8 / 24 × 100 (3)	
	= 33.3(%) (4)	
	8 / 14 $\times$ 100 = 57(%) (3) if correct equation stated	
	$8/20 \times 100 = 40(\%)$ (3) if correct equation stated	
	Any other answer that is 8 / y $\times$ 100 is 2 marks if correct equation for ROCE is also stated.	
	OFR	
4(a)(ii)	(ii) gearing ratio	3
	Non-current liabilities (NCL) / shareholder equity × 100 OR	
	debt / shareholder equity $\times$ 100 (1 mark if no rewardable calculation) shareholder equity = 10 + 10 = 20 (1)	
	NCL / capital employed $\times$ 100 (1 mark if no rewardable calculation) Capital employed = 4 + 10 + 10 = 24 (1)	
	Gearing = 4 / 24 × 100 (2)	
	= 16.7% or 17% (3)	
	Gearing = 4 / 20 × 100 (2) = 20% (3)	
	Note: If candidate uses incorrect capital employed figure from <b>4(a)(i)</b> then OFR applies and candidate can still gain full marks.	

Question	Answer	Marks
4(a)(iii)	(iii) dividend cover	2
	<ul> <li>Maximum of 1 mark for any of the following</li> <li>Profit after tax / dividends payable</li> <li>Profit after tax = 8 - 4 = 4</li> <li>Dividend cover = 8 - 4 / 4 = 4 / 4</li> </ul>	
	Two marks for dividend cover = 1	
	Other answer Operating profit / Dividends paid: 8 / 4 = 2 (1)	

Question			Answer	,		Marks

6	<ul> <li>Analysis:</li> <li>Analysis is about the use of the techniques to shape decision rather than analysis of factors in the decision.</li> <li>The time, money and effort needed to conduct SWOT analysis and impact on HD</li> <li>Effective SWOT analysis may result in clearer and more relevant business objectives, better strategic decisions and less risk as HD will be better prepared for the future</li> <li>How SWOT analysis will improve business planning and decision making, reduces risk</li> <li>Analysis of how information in Appendix 1 might guide strategic decisions</li> <li>Focus on strengths will reduce risk to the business</li> <li>Identification of consequences of weaknesses such as high labour turnover of design engineers for alternative strategic options</li> <li>Anticipating changes to the external environment such as new technology replacing circuit boards and how that impacts the different strategies</li> <li>Generation of possible objectives relating to option 1 and 2 from the SWOT analysis.</li> <li>Relating SWOT to the options and to corporate objective of growth.</li> </ul> Evaluation: <ul> <li>How up to date the SWOT analysis is</li> <li>Subjectivity of individual conducting the SWOT analysis.</li> <li>Importance of understanding where the business is now in order to generate ideas and/or support for expansion.</li> <li>Weighing up importance of other stages in strategic management especially objectives and choice techniques are also important:</li> <li>Understanding the market through appropriate PEST analysis will inform HDs decisions and strategic choice techniques are also important.</li> <li>Understanding the market through appropriate PEST analysis will inform HDs decisions and improve effectiveness of strategy choice - Understanding the market through appropriate PEST analysis will inform HDs decisions and improve effectiveness of strategy choice - Understanding the market through appropriate PEST analysis will inform HDs decisions and improve effectiveness of strategy choice -</li></ul>	

Question	Answer	Marks
7	Evaluate the role of corporate planning in the successful implementation of either option 1 or option 2.	20
	Note: Answers may address or be in relation to either option 1 or 2, or to both	
	<ul> <li>Knowledge:</li> <li>Business Plan: A written document that describes a business, its objectives and its strategies, the market it is in and its financial forecasts.</li> <li>Corporate Plan: This is a methodical plan containing details of the organisation's central objectives and the strategies to be followed to achieve them.</li> <li>A business/corporate plan: <ul> <li>Gives direction to the business. The plan provides HD's directors with a clear focus for what the company should be trying to achieve in the medium term.</li> <li>Helps motivate staff. It provides a sense of purpose.</li> <li>Enables planning at different levels of the business and ensures all staff are working towards the same goals.</li> <li>Acts as a means for control and review. Actual outcomes can be compared with the objectives set and the performance of HD can be assessed.</li> <li>Helps ensure that resources are used effectively and that all departments are working together.</li> <li>Contingency planning</li> </ul> </li> <li>The planning process itself is useful. It encourages directors and managers to consider the current situation of the firm and to set objectives accordingly.</li> <li>Corporate plans will include techniques of strategic analysis such as SWOT and Porter's 5 Forces</li> <li>How dynamic markets may affect plans</li> <li>Potential link between profitability and having clear business plans</li> <li>Provides clear focus to senior managers.</li> <li>Enables control and review process.</li> <li>Of interest to potential investors and staff.</li> </ul>	
	<ul> <li>Corporate plan provides clear objectives to then use in setting objectives at departmental and individual level through MBO</li> <li>Application: <ul> <li>Making use of the business context:</li> <li>HD design, manufacture and supply circuit boards.</li> <li>Content of option 1 (focus is production/operations) and option 2 (focus is product development).</li> <li>Cost and implications for finance – Option 1 may need external finance – link to gearing which is relatively low</li> <li>Need for recruitment of design engineers with different skills in Option 2</li> <li>Corporate objective of continued long-term growth</li> <li>HD's mission statement: 'to provide world class software' link to low-cost manufacturing and quality</li> <li>Timescale - short to medium term</li> </ul> </li> </ul>	

Question	Answer	Marks
7	<ul> <li>Analysis:</li> <li>Both options involve significant change but in different areas.</li> <li>Business plan integrates functions, finance and management.</li> <li>Relationship of business plan to other elements of strategic implementation.</li> <li>Suggestions for content of plan relating to chosen option.</li> <li>Advantages and disadvantages of producing a business plan.</li> <li>Business plan for an option may enable other aspects of the business to be more effective, increasing chances of success for that option.</li> <li>Involvement in producing the plan can engage employees and lead to more motivation and efficiency.</li> <li>Planning helps reduce risk by anticipating changes in the market and preparing the business for the future. Without a plan HD will lack direction and objectives.</li> <li>Planning helps control expenditure and therefore reduces risk of cashflow problems.</li> <li>Strategic decisions affect all parts of the organisation, so planning is important to coordinate activities.</li> <li>Planning is time-consuming and can be expensive, the more detail the greater the time and cost.</li> </ul>	
	<ul> <li>Evaluation:</li> <li>Only award EVAL if the candidate has also demonstrated APP.</li> <li>Justified conclusion on importance of corporate planning.</li> <li>Plan only as good as the information, analysis and choice techniques it is based on.</li> <li>Plan effective only if communicated, understood and implemented.</li> <li>Plan must be flexible and adaptable to be effective</li> <li>Plan must integrate functional area plans and contain contingency planning</li> <li>The business environment is dynamic and there can be unexpected internal and external events. Business planning cannot eliminate risk only reduce it.</li> <li>Contingency planning necessary to deal with the unexpected but can be expensive.</li> <li>Reliability of information – how much is spent on market research / data gathering and how relevant is it? Interpretation of information used in planning can be influenced by skills and training of leadership.</li> <li>Monitoring and review essential to ensure costs are not increasing in this rapidly changing market.</li> </ul>
